Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 00:00 on Thursday 08 Jul 2021 until 23:59 on Friday 09 Jul 2021

Forecast Issued on Wednesday 07 Jul 2021 at 15:07

Confidence: High for the broadly showery theme over the next few days, but low for the detail and distribution of showers and therefore also sunshine amounts. High for showers intensifying through the weekend.

Headline for Thursday 08 Jul 2021: Sunny spells and a few afternoon showers.

Mountain weather hazards on Thursday 08 Jul 2021

Forecast for Thursday 08 Jul 2021

Weather: Patchy low cloud will bring some hill fog to western areas during the early hours until just after dawn, but this will quickly lift leaving sunny spells, and just a few showers developing for the afternoon. One or two of the showers could be heavy, but they should ease and die away by evening leaving some clear spells. UV levels will be very high and with light winds it will feel warm in the sunshine.

Chance of cloud free mountain/hill tops above 600m: 70% first thing becoming 90% or better mid-morning onwards.

Visibility: Moderate at times and rather misty in some western areas during the early hours until just after dawn when patchy low cloud will cover slopes around 300-400m. Otherwise generally very good with only brief deteriorations in any afternoon showers when cloud may lower to around 800m.

14:00 on Wed 07 Jul 2021	10.6mm	30mm	38.2mm

Forecast for Friday 09 Jul 2021

Weather: Largely dry through the early hours, although misty beneath any low cloud. It will be a cloudier day than Thursday, with scattered light showers developing soon after dawn. The showers will continue on and off through the day, but should fade away late afternoon onwards leaving a largely dry evening.

Maximum wind: Southwesterly 10mph.

Chance of cloud free mountain/hill tops above 600m: 60% at first improving to 90% by late morning.

Visibility: Patchy low cloud may affect west and southwestern areas at times through the early hours and first thing on Friday morning, covering some slopes around 400m and bringing locally very misty conditions. Any low cloud will lift during Friday morning with generally good visibilities prevailing, with only patchy cloud occasionally covering slopes above 800m. Some deteriorations are likely in showers, when views of nearby hills will appear somewhat misty, and with cloud perhaps briefly lowering closer to 600m.

Temperature: **Valleys:** Plus 10 Celsius becoming Plus 18 Celsius.
At 600m: Plus 12 Celsius.
Freezing level: Well above the summits.
